

14:30 - 15:00

THE INFLAMMATION NETWORK

3rd Inflammation Network Day

8th March 2023 @ 12:30-18:00 Auditorium G206-142, entrance G Aarhus University Hospital

12:30 – 13:00	Welcome coffee and registration
13:00 – 13:05 13:05 – 13:10	Welcome remarks Trine Mogensen, Managing Professor of the Inflammation Network Opening of meeting Anne-Mette Hvas, Dean at the Faculty of Health, Aarhus University
	Session 1 - Tumor Microenvironment and Rheumatology
	(Chairs: Karina Dalsgaard Sørensen + Kenneth Green)
13:10 – 13:40	Keynote: Molecular differences between angiogenic and blood vessel co-opting colorectal liver metastases Dr. Lena-Christin Conradi, Göttingen University Medical Center, Germany
13:40 – 14:00	Highlight talk: A new look at two classical inflammatory diseases – Diagnosis, Complications and Treatment of Polymyalgia Rheumatica and Giant Cell Arteritis Ellen Margrethe Hauge, Professor, Dept. of Clinical Medicine - Rheumatology, Aarhus University & Aarhus University Hospital
14:00 – 14:30	Flash talks (1-5) Pro-inflammatory polarization inhibits macrophage phagocytosis of cancer cells in vitro (presenter: Kristian W. Antonsen)
	Establishment of a new 3D-co-culture model containing PDOs, endothelial cells and fibroblasts (presenter: Anneke Stolte)
	PD-1hi cells are highly present in the rheumatoid joint, and express regulatory capacities (presenter: Sofie Rask)
	Mapping niche dynamics at single-cell resolution to boost the regenerative potential of aged skeletal muscle (presenter: Stig Henrik Andersen)
	Self-reported periodontitis is associated with impaired smell and taste (presenter: Luisa Schertel Cassiano)

Coffee, cake and networking

THE INFLAMMATION NETWORK

	SESSION 2 - MICROBIOME INTERACTIONS
	(Chairs: Holger Brüggemann + Anne Birkeholm Jensen)
15:00 – 15:30	Keynote: Immune sensing of oral microbiota: implications in precision health and medicine Margaret Sällberg Chen, Professor, Dept. of Dental Medicine, Karolinska Institutet, Sweden
15:30 – 15:50	Highlight talk: Gut microbiome therapies in inflammatory diseases Christian Lodberg Hvas, Associate Professor, Dept. of Clinical Medicine - Hepatology and Gastroenterology, Aarhus University & Aarhus University Hospital
15:50 – 16:10	Flash talks (6-8)
	Faecal microbiota transplantation for first or second Clostridioides difficile infection (EarlyFMT) (presenter: Sara Ellegaard Andreasen)
	Leveraging serial intravital 2-photon microscopy to interrogate autoimmune processes in the spleen (presenter: Layla Pohl)
	The caspase-2-tBID axis mediates Gasdermin E-dependent pyroptosis in neurons lytically infected with HSV-2 to promote inflammation (presenter: Fanghui Ren)
16:10 – 16:30	Coffee and networking
	SESSION 3 - VIRAL INFECTION AND INFECTIOUS DISEASES
	SESSION 3 - VIRAL INFECTION AND INFECTIOUS DISEASES (Chairs: Anne Troldborg + Lotte Lindgreen Eriksen)
16:30 – 16:50	
16:30 – 16:50 16:50 – 17:10	(Chairs: Anne Troldborg + Lotte Lindgreen Eriksen) Highlight talk: Improvement in T cell immunity following treatment with monoclonal anti-HIV antibodies – a vaccinal effect? Ole Schmeltz Søgaard, Professor, Dept. of
	(Chairs: Anne Troldborg + Lotte Lindgreen Eriksen) Highlight talk: Improvement in T cell immunity following treatment with monoclonal anti-HIV antibodies – a vaccinal effect? Ole Schmeltz Søgaard, Professor, Dept. of Clinical Medicine - Infectious Diseases, Aarhus University and Aarhus University Hospital Highlight talk: NRF2 controls an unappreciated anti-viral network important for severe
16:50 – 1 <i>7</i> :10	(Chairs: Anne Troldborg + Lotte Lindgreen Eriksen) Highlight talk: Improvement in T cell immunity following treatment with monoclonal anti-HIV antibodies – a vaccinal effect? Ole Schmeltz Søgaard, Professor, Dept. of Clinical Medicine - Infectious Diseases, Aarhus University and Aarhus University Hospital Highlight talk: NRF2 controls an unappreciated anti-viral network important for severe covid Christian K. Holm, Professor, Dept. of Biomedicine, Aarhus University Flash talks (9-11) Time dependent characterization of protein profiles in different tissues induced by chronic infection with lymphocytic choriomeningitis virus (presenter: Asif Manzoor
16:50 – 1 <i>7</i> :10	(Chairs: Anne Troldborg + Lotte Lindgreen Eriksen) Highlight talk: Improvement in T cell immunity following treatment with monoclonal anti-HIV antibodies – a vaccinal effect? Ole Schmeltz Søgaard, Professor, Dept. of Clinical Medicine - Infectious Diseases, Aarhus University and Aarhus University Hospital Highlight talk: NRF2 controls an unappreciated anti-viral network important for severe covid Christian K. Holm, Professor, Dept. of Biomedicine, Aarhus University Flash talks (9-11) Time dependent characterization of protein profiles in different tissues induced by chronic infection with lymphocytic choriomeningitis virus (presenter: Asif Manzoor Khan) STING is redundant for host defense and pathology of COVID-19-like disease in mice
16:50 – 1 <i>7</i> :10	Highlight talk: Improvement in T cell immunity following treatment with monoclonal anti-HIV antibodies – a vaccinal effect? Ole Schmeltz Søgaard, Professor, Dept. of Clinical Medicine - Infectious Diseases, Aarhus University and Aarhus University Hospital Highlight talk: NRF2 controls an unappreciated anti-viral network important for severe covid Christian K. Holm, Professor, Dept. of Biomedicine, Aarhus University Flash talks (9-11) Time dependent characterization of protein profiles in different tissues induced by chronic infection with lymphocytic choriomeningitis virus (presenter: Asif Manzoor Khan) STING is redundant for host defense and pathology of COVID-19-like disease in mice (presenter: Giorgia Marino) Associations between patient-reported outcomes, liver inflammation and fibrosis in
