

Forskningsnetværket for multicenterstudier

30. januar 2024 kl. 15.30-17; auditorium G206-122, G206 Plan 2

Topic: How to prepare for a high impact publication

Speaker: We have invited Nazrul Islam, Associate professor of Epidemiology and Medical Statistics at the University of Southampton Faculty of Medicine, and a Principal Methodologist at the Office for National Statistics (ONS). He will talk about his role as Research Editor at the BMJ and how, in his view, one can best prepare to publish one's RCT in a high impact journal. Currently the BMJ has an impact factor of 107.7. His own experience as a researcher comes from randomized studies as well as large observational studies in the primary sector. (Nazrul gives his presentation virtually.)

30. april 2024 kl. 15.30-17; auditorium G206-142, G206 Plan 2

Topic: How does a clinical trial unit look within our organization?

Speaker: Graeme MacLennan, professor of medical statistics and director of the Centre for Health Care Randomised Trials (CHaRT), University of Aberdeen will give a virtual talk on the organization of their successful clinical trial unit. After Graeme's presentation, he has kindly agreed to remain online to support our collaborative discussion on the requirements and aspirations for a Clinical Trial Unit within our organisation. We are pleased that Jørgen Frøkiær, Head of the Department of Clinical Medicine, will attend and contribute to the discussions.

27. august 2024 kl. 15.30-17; Auditorium J116-113, J110 Plan 1

Emne: Design and statistical issues in RCTs

Oplægsholder: We have invited Ed Juszcak, professor of Clinical Trials & Medical Statistics from the Nottingham Clinical Trials Unit to give a presentation about frequent challenges in the design of an RCT. Prof. Ed Juszcak has extensive experience in the design, implementation, analysis and reporting of clinical studies. He is, among other things, first author on a CONSORT guideline on reporting of multiarm studies and was the responsible statistician in the design of the RECOVERY study.

Ed specifically wanted to come and give a personal presentation, so don't miss this chance to come and meet an inspiring and very experienced professor in clinical trials.

26.november 2024 kl. 15.30-17; auditorum G206-142, G206 Plan 2

Topic: Alternative trial designs

Speaker: We have invited Jonathan Cook, professor of Clinical Trials & Medical Statistics from Oxford University to give a presentation about alternative trial designs, e.g. cluster trials, cross-over trials, multiarm trials etc. Prof. Jonathan Cook has over 300 publications in leading medical, methodological and epidemiological journals. In addition, he is deputy editor of the journal Clinical Trials and a member of the editorial board of the journal Trials. Jonathan will give his presentation virtually.
